

WHITMIRE MICRO-GEN  
**Prescription Treatment**® brand  
**381B Advance**® liquid ant bait

**Superior Formulation**

Ants readily consume sugary liquids. Prescription Treatment® brand 381B Advance liquid ant bait has a balanced formulation of sugar and water that ants desire and the performance results PMPs need.

**Colony Elimination**

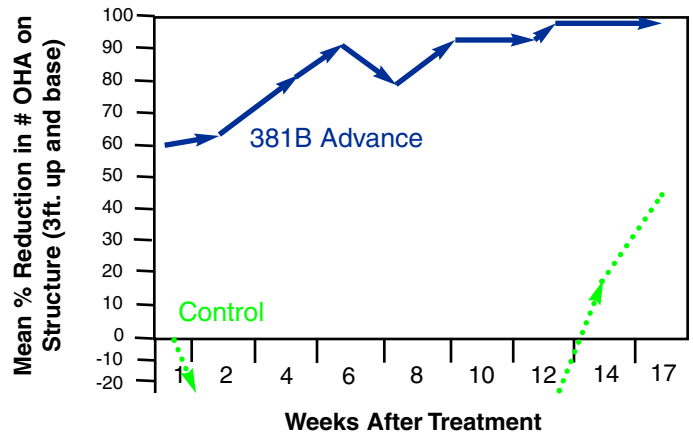

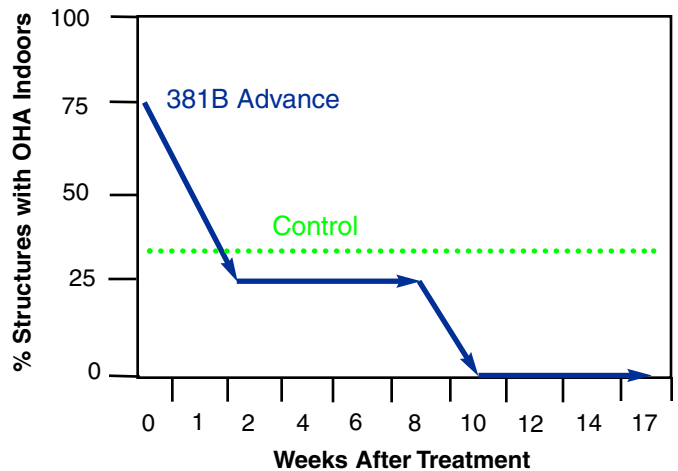

PT® brand 381B Advance liquid ant bait delivers 1.3% borax in every drop of bait. When discovering PT 381B liquid ant bait, the ants consume the bait, recruit other workers and eventually pass the toxicant to other colony workers. Overtime the colony is eventually eliminated. To successfully eliminate an ant colony, always maintain a fresh supply of PT brand 381B Advance liquid ant bait.

**Controls**

- |           |               |
|-----------|---------------|
| Acrobat   | Honey         |
| Allegheny | Little Black  |
| Argentine | Odorous house |
| Bigheaded | Pavement      |
