

Pyreth-It[®] Formula 2 Pyrethrum Insecticide

TECH NOTES

When You Need Maximum Power, Pyreth-It Delivers.

Pyreth-It is a highly concentrated pyrethrum insecticide with a high synergist ratio. It provides rapid knockdown and kill for heavy infestations, cleanouts and other difficult situations. Whether used alone or tank mixed with other insecticides, Pyreth-It delivers quick kill of ants, cockroaches, beetles and other crawling insects.

Application Guidelines

- Combine with residual insecticides like Cy-Kick[®] CS Controlled Release Cyfluthrin. The flushing power of Pyreth-It will cause greater contact with residual insecticides resulting in quicker and more complete control.
- Food processing operations may continue when this product is applied as a surface spray (except in federally inspected meat and poultry plants where food processing operations must be stopped).
- Tank mixing applications must be made in accordance with all label limitations and precautions.

Usage Guidelines

- **For tank mixing with other insecticides**, use 1/4 to 1 ounce per gallon water or oil for increased flushing.
- **For indoor surface spray treatments**, use 2-10 ounces per gallon of water or oil (for USDA inspected facilities, use 6.5 ounces per gallon of water or oil and apply at a rate of 1 gallon per 750 square feet).
- **For space treatment**, use 4-10 ounces per gallon of water or oil and space treat at a rate of 1/2 -1 ounce diluted spray per 1000 cubic feet.

Tank Mixing Rates		
1 Gallon	Low	1/4 oz
	High	1 oz
3 Gallons	Low	3/4 oz
	High	3 oz
25 Gallons	Low	6 1/4 oz
	High	25 oz

Benefits

- Fast knockdown and kill:** 6-60 formulation
- Broad spectrum control:** Labeled for over 100 pests
- Versatile tool for difficult pests:** For indoor and outdoor use
- Increases the effectiveness of other treatments:** Flushes insects from hiding

Specifications

- Active Ingredient:** 6% Pyrethrum, 60% PBO
- Signal Word:** CAUTION
- Packed:** 6 x 1 pint / case; 120 cases / pallet
- EPA Registration Number:** 499-475
