Vector
Bio-5™

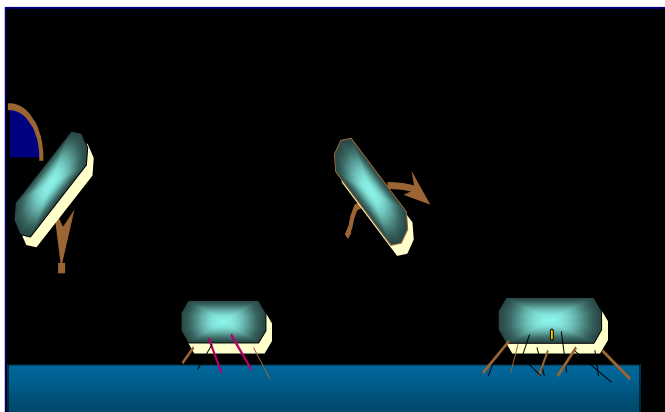

SYSTEMS AND SUPPORT FOR INNOVATIVE SOLUTIONS

More than just a drain cleaner

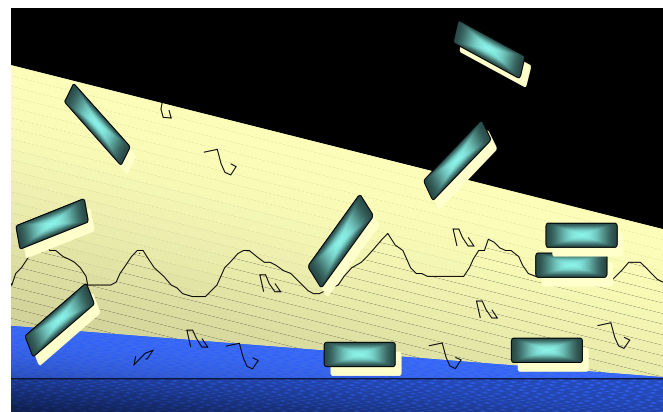

Vector Bio-5™ is a multipurpose drain cleaner that quickly removes drain pest harborage, protects the drain from depositing material and eliminates odors from decaying matter. Vector Bio-5™ is perfect for severely clogged drains, maintaining drain flow in a maintenance program, and for cleaning and eliminating odors around disposal related areas.

Superior Performance

Vector Bio-5™ provides the level of performance necessary to meet the needs of residential and commercial customers. The following illustrations show how Vector Bio-5™ cleans drains and pipes to maintain good water flow.

Vector Bio-5™ bacteria attach to the pipe in areas of debris and other organic matter. Once attached, the bacteria produce enzymes to break down the organic material. The Vector Bio-5™ bacteria also multiply through cell division creating more enzyme-producing bacteria in the pipe.

- ▼ continually regenerates
- ▼ protects bacteria
- ▼ seeds the liquid phase
- ▼ aerobic and anaerobic bacteria

Features

- ▼ Very quick clog removal
- ▼ Feeds on organic matter until completely consumed
- ▼ Five strains work on a variety of substrates
- ▼ Versatile label use directions
- ▼ Reduces breeding sites for drain pests
- ▼ Effective in all types of plumbing
- ▼ Long term shelf life of 2 to 4 years
- ▼ Biodegradable and Salmonella-free

IPM

Vector Bio-5™ is an essential part of any Integrated Pest Management Program. Sanitation of the drain system is a key element of insect food and harborage removal.

Odor Eliminator

Vector Bio-5™ eliminates odors by consuming decaying matter and by out-competing odor-producing micro-organisms for food. Vector Bio-5™ is an excellent odor eliminator for around dumpsters, garbage areas and other areas where food and debris are constantly dropped and accumulated (floor cracks and floor/wall spaces in food production areas, drive-through restaurant window service areas and concession stand areas).

Application

To clean out a drain, use 4 to 8 ounces of Vector Bio-5™ and repeat as necessary. To quicken the results use 2 to 4 gallons of water to flush the drain system.

To maintain good flow throughout the drainage system, follow a maintenance program utilizing 2 to 4 ounces of Vector Bio-5™ in each drain every 1 to 2 months. To clean and eliminate odors on surfaces, mix 2 to 4 ounces of Vector Bio-5™ with water in a quart trigger sprayer or 4 to 8 ounces of Vector Bio-5™ with a gallon of water to apply with a mop, compressed air sprayer or through a power washer.
